REMOTE MONITORING 0800 HARVEST

Orchard Monitoring Systems

"Information at your fingertips"

The Harvest System is an internet based remote monitoring solution covering a range of applications, to assist with efficient management of resources and maximise return on investment.

The Harvest System utilises wireless remotes and integrated cellular modem to log a variety of data and send to the Harvest servers. Information can be viewed using any computer or smartphone.

- Frost Alarms

- Localised Forecast (optional)

- Weather Monitoring
  (calculations for evapotranspiration, leaf wetness, wet bulb, dew point etc)
