

Harvest Electronics

Rural Fire Weather Station

Live data with hourly updates can be seen at nrfa.harvest.com plus districts have the option to join ruralfiredanger.co.nz which allows for more in-depth data to be shown.

Upgrade of existing weather station:

- \$5,700

Kit Includes:

- New telemetry data logger (Vodafone or Spark cellular network)
- Weatherproof enclosure with solar panel and battery
- Vaisala Ultrasonic Wind Sensor
- Air Temperature and Humidity Sensor
- Easy self-installation
- Self calibration (annual)

The upgrade kit uses the existing rain gauge and mast. The ultrasonic wind sensor mounts on top of the existing mast.

New weather station:

- \$8,025 with 5m Mast
- \$9,275 with 10m Mast

Kit Includes:

- New telemetry data logger (Vodafone or Spark cellular network)
- Weatherproof enclosure with solar panel and battery
- Hydrological Services TB6 Rain Gauge
- Vaisala Ultrasonic Wind Sensor
- Air Temperature and Humidity Sensor
- Easy self-installation
- Self calibration (annual)

Versions with Iridium satellite modems are available, please contact Harvest if you require prices. Optional web camera available.
