Vineyard Monitoring Systems

"Information at your fingertips"

The Harvest System is an internet based online solution covering a range of applications, to assist with efficient management of resources and maximise return on investment.

- Frost Alarms
- Soil Moisture Monitoring
- Localised Forecast (optional)
- Weather Monitoring
(calculations for evapotranspiration, leaf wetness, wet bulb, dew point etc)
- Wind Machine Monitoring
(run status, battery voltage and RPM)
- Water Monitoring
(flow meters, pressure, well and bore depth)
- Data accessible via Harvest website
(updated every minute in frost conditions)

The Harvest System utilises wireless remotes and integrated cellular modem to log a variety of data and send to the Harvest servers. Information can be viewed using any computer or smartphone.
