The Harvest System is an internet based online solution covering a range of applications, to assist with efficient management of resources and maximise return on investment.
The Harvest System utilises wireless remotes and integrated cellular modem to log a variety of data and send to the Harvest servers. Information can be viewed using any computer or smartphone.

- Frost Alarms
- Localised Forecast (optional)
- Weather Monitoring (calculations for evapotranspiration, leaf wetness, wet bulb, dew point etc)
- Wind Machine Monitoring (run status, battery voltage and RPM)
- Water Monitoring (flow meters, pressure, well and bore depth)
- Soil Moisture/Temperature Monitoring
- Data accessible via Harvest website (updated every minute in alarm conditions)
