REMOTE MONITORING 0800 HARVEST

Irrigator Monitoring & Effluent Failsafe

The Harvest Irrigator Monitor provides reliable, real-time irrigator data and proof of placement, including failsafe control for effluent management.

Irrigator Monitor Features:

- Solar powered
- Monitors wheel speed, line pressure at irrigator and GPS (with Google Map view and fast sampling for proof of placement)
- Automatic pump shutoff with alarms (failsafe) (e.g. if line pressure drops or irrigator stops moving)
- Data accessible on Harvest website (compatible with smartphones)
- Optional Web App customised for smartphone viewing
- Online pump control (accessible via secure smartphone compatible web page)
