REMOTE MONITORING 0800 HARVEST

Farm Monitoring & Control Systems

"Information and control at your fingertips"

The Harvest System is an internet based, remote monitoring and control solution covering a range of applications, to assist with efficient management of resources and maximise return on investment.

Features:

- Soil Moisture Monitoring
- Weather/Evapotranspiration Monitoring
- Irrigator Tracking and Failsafe
  (speed, pressure, GPS tracking, pond level)
- Water Meter Monitoring
- Water Tank Monitoring
- Electric Fence Monitoring
- Milk Vat Monitoring and Alarms
- Feed Silo Monitoring
- Web App for Smartphones

An integrated IoT cellular modem is used to send data to the Harvest servers. Information can be viewed using any computer or smartphone.
